EDUCATION

University of Padua

B.Sc. in Computer Engineering

Sep 2026 – Jul 2029

Padua, Italy

- Relevant coursework: Data Structures & Algorithms, Operating Systems & Networks, Calculus I–II, Linear Algebra & Geometry

ITIS Carlo Zuccante

Technical Diploma in Computer Science and Information Technology – **100/100 with honors**

Sep 2021 – Jun 2026

Venice, Italy

- Named to the Italian Ministry of Education's **National Register of Academic Excellence**.
- Relevant coursework: OOP (Java), Web Development, Databases & SQL, Mobile Development (Flutter), RAG (Python)

WORK EXPERIENCE

Arsenale Moto

Full-Stack Developer – Contract | Live Site [↗](#)

May 2026 – Jul 2026

Venice, Italy (Remote)

- Developed and launched the company's first production website as the sole developer, delivering the frontend, CMS integration, and server-side functionality with Next.js and TypeScript.
- Cut motorcycle publishing time to **approximately one minute** by designing role-based CMS workflows across 10 staff roles, enabling non-technical employees to manage content while protecting sensitive actions.
- Built a secure Resend workflow handling **10–20 customer valuation requests per day**, with server-side validation, domain authentication, anti-spam controls, and branded email templates.
- Automated production releases with a GitHub-to-Dokploy deployment pipeline while managing the VPS and hosting environment and providing ongoing CMS support.

New Art Vanguard

Full-Stack Developer – Contract | Live Site [↗](#)

Feb 2026 – Jul 2026

Miami, FL (Remote)

- Improved the production website by modernizing 5+ existing pages and delivering 3 new ones with reusable responsive components in HTML, CSS, JavaScript, and PHP.
- Reduced setup and release time by **25%** by containerizing local development and VPS deployments with Docker.
- Delivered client features end to end within a three-developer team by translating requirements into implementation, testing, documentation, and final project handoff.

Dacos S.r.l.

Software Developer Intern

May 2025 – Jun 2025

Venice, Italy

- Delivered a Vue.js e-commerce prototype within a two-developer team by using Git for collaborative development and Docker to standardize the local environment.
- Improved application stability at up to **100 concurrent users** by optimizing database queries and adding caching to eliminate redundant reads.
- Facilitated project handoff by presenting the prototype to stakeholders and documenting its architecture, key decisions, and technical trade-offs.

PROJECTS

European Tech Opportunities 2027

Python, TypeScript, Next.js, SQLite, Docker

Live Site [↗](#) | GitHub Repository [↗](#) | 2026

- Built and deployed an open-source directory of **700+ European tech internships and new-grad roles**, reaching **2.6K+ users**, **15K+ page views**, and **60+ countries**, with traffic from **15+ sources** including Google, GitHub, ChatGPT, Claude, and Perplexity.
- Engineered an asynchronous Python pipeline with deterministic classification and transactional SQLite lifecycle tracking, serving a searchable Next.js application, versioned public API, and CSV/JSON exports.
- Validated data integrity and critical user workflows with Pytest, Playwright, and accessibility checks, with automated collection, CI security scanning, and browser-local persistence.

Codex Limits

TypeScript, Bun, React, Ink, Node.js

GitHub Repository [↗](#) | 2026

- Built and published a cross-platform TypeScript CLI and React/Ink dashboard to monitor Codex usage limits, reset times, and credits, with stable JSON output and threshold checks for automation.
- Designed a shared discovery and normalization layer powering **3 coding-agent integrations**—OpenCode, Pi, and GitHub Copilot CLI—with credential redaction and confirmation-gated credit redemption.
- Reached **2,800+ npm downloads**, supported by automated behavior and integration tests, GitHub Actions, cross-platform package validation, and automated npm publishing.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, TypeScript, PHP

Web & Frameworks: HTML/CSS, React, Next.js, Vue.js, Tailwind CSS, Node.js, Bun

Databases & Tools: MySQL, PostgreSQL, SQLite, MariaDB, Git, GitHub Actions, Linux, Docker
